REGION

Dr Nii Quaynor takes to the microphone during the AFRINIC-21 Meeting in 2014

## DR NII QUAYNOR ONE OF THE FOUNDING FATHERS OF THE AFRICAN INTERNET

“It took the elders a decade to build consensus for forming AfriNIC, it has taken the developers a decade to establish AfriNIC: We must have a strong AfriNIC community before the end of the next decade.”

# INTRODUCTION

ADIEL A. AKPLOGAN  
CEO AFRINIC 2004 - 2015

It was back in 1997, in Kuala Lumpur, when the seeds of the idea of a Regional Internet Registry for Africa were first planted by some of the brightest lights in Africa's Internet history. From that moment on, our pioneers worked tirelessly to make that idea a reality. I'd like first of all to recognise and thank Alan Barrett, Dr Nii Quaynor, Sana Bellamine, and Nashwa Abdel-Baki who put together the first proposal in writing back in 1997. On the day that AFRINIC received its formal accreditation from ICANN in April 2005, many years of hard work and negotiation had already taken place to ensure that the world's fifth RIR would be ready for business.

Our region presented us with unique and distinct challenges during the proposal, the set up and throughout the early years of this continent-shaping organisation. Although it wasn't always easy, we rose to those challenges, collaborated, and pulled together each corner of Africa and beyond to ensure that AFRINIC would become what it is today in 2015: a fully functioning RIR with over 1,150 active members and more than 40 competent and dedicated staff. AFRINIC is now lucky enough to be able to count on the support of a collaborative, innovative community of thousands, on the knowledge and experience of a tight-knit, loyal Board of Directors, on the wisdom of our Council of Elders, and on the support of our local, regional and global partners and sister organisations. Without this vast network of belief, support and collaboration, none of this would have been possible.

However, our work is still not done. We must not stop building upon these strong foundations that we have planted firmly in the ground. As the African and global Internet industry moves into a new phase of its development, more hard work is needed to ensure that our RIR continues to go from strength to strength. Not only do we need to continue to build and expand our community to

include those who are currently underrepresented in the African Internet sphere, we must also make sure that the infrastructure, information, education and policies that are needed to ensure that the next billion African Internet users are able to get online are firmly in place. We cannot do this without the support and guidance of the community and membership.

I'd like to extend a special note of thanks to AFRINIC's first and second Board of Trustees on behalf of the entire community: Tarek Kamel, Zakaria Ould Amar, Charles Mussi, Ibrahim Ahmed, Nii Quaynor, Pierre Dandjinou, Samuel Nogha, Kouma Cyriaque Didier, Alan Barrett, Silvio Almada, Yann Kwok Kem Yen, Haja Ramboasalama, Pierre M. Kasengedia and Richard Bell who set the pace and ensured that our dreams did not fade away. My appreciation also goes to our international supporters, including Randy Bush, who encouraged the pioneers to write the proposal in the first place. Pierre Ouedraogo, David Conrad, Daniel Karrenberg, Kim Hubbard and Andrew McLaughlin, thank you for the support and advice you provided back in those early days. I cannot close this section of appreciation without mentioning our sister RIRs and the other Internet industry organisations whose unwavering support has been instrumental in our success.

In this book, we have highlighted **just a few** of the people and organisations who have contributed to AFRINIC's success but our thanks and appreciation are extended to anyone and everyone who has been part of this adventure from the beginning to the present day. We look forward to sharing the next 10 years of AFRINIC with you.

My sincerest thanks and gratitude to you all.

AFRINIC en Avant!

ALAN BARRETT  
INTERNET PIONEER AND  
AFRINIC CEO 2015

It has been a great privilege to be associated with AFRINIC right from the start. I have watched it grow from just an idea, to an idea with community support, and then from an organisation with two employees, to more than 40 people today. AFRINIC's current success is very much due to Adiel Akplogan. He supported

AFRINIC when it was just an idea, and he became the first employee and the first CEO. He took responsibility for all aspects of the organisation, from policy development through finance, staffing, and external relations. As the new CEO, I hope to continue AFRINIC's success.

**SUNDAY FOLAYAN**  
AFRINIC Board Chair 2015

AfriNIC has afforded me the opportunity to appreciate the immense talents all around the African continent. At the various meetings and interactions both online and offline, I have made very many friends and built relationships that certainly make me proud of my continent. I look forward to the future and success of AfriNIC - the chord that binds us who see the entire world as a village.

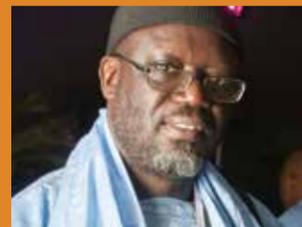

**BADRU NTEGE**  
AFRINIC Board Vice Chair 2015

It was 2003 when I first got involved in AfriNIC. To me it has been a lifetime experience of meeting and getting to know people from the continent. The technical connectivity that AfriNIC has enabled is complemented by the social connections we have made and continue to make. I look forward to the next 10 years with positive anticipation!

**ALAN LEVIN**  
Founding Board Member (2004 -2007), Chair of ISOC ZA Chapter, CEO Vanilla Networks

AfriNIC will always remain close to my heart. I feel most flattered and proud to have been appointed one of the founding Board Members and Directors of AfriNIC. We learned many lessons in the process of creating the African Registry. Considering the vastness and challenges of the region, I feel that our successes resonate globally. Whilst we can all be proud of these successes I strongly encourage the spirit of volunteerism expressed by all stakeholders involved in AfriNIC from anywhere, and extend my sincere appreciation to all those who volunteer at every level.

**MOUHAMET DIOP**  
AFRINIC Observer at the ASO Address Council, ASO Appointee to the ICANN Board (2001 to 2006), Coordinator of AFREGISTRAR

Since 1996, I have been involved as one of the first AFRINIC observers for the ASO Address Council, travelling around the world, spreading the word about AFRINIC during the other RIR meetings, from San Francisco to Amsterdam to Brisbane, where I explained to the global community the need for an RIR for Africa. AFRINIC's inception is the illustration that the African continent can achieve astonishing and amazing results for itself and by itself. When politics are far away, and when determination, expertise and knowledge work together in the sole interest of Africa development, we, African people, are able to move mountains.

The 2014 AFRINIC Board of Directors during a retreat in 2014. From left: Paulos Nyirenda, Mark Elkins, Badru Ntege, Adiel Akplogan (CEO), Sunday Folayan, John Walubengo, Christian Bape, Janvier Ngoulaye, Kris Seeburn, Haitham Z. El Nakhal. Front: Anne-Rachel Inné (COO), Lala Andriamampianina. Not pictured: Aminata A. Garba.

Vint Cerf chats with Adiel Akplogan during a visit to the AFRINIC offices in 2013

## VINT CERF FORMER CHAIRMAN OF ICANN CHIEF INTERNET EVANGELIST, GOOGLE

"AFRINIC is celebrating its 10th anniversary and that is indeed worthy of serious celebration. I had a very small part to play in the formation of AFRINIC as the then-Chairman of ICANN and as an enthusiast today. I believed that Africa had an important opportunity to demonstrate leadership and cooperation on its continent. While I am no expert, I appreciate very much the challenge that the formation of AFRINIC must have posed for its founders. Not every country in Africa is aligned along exactly the same axis, just as one finds policy differences among the European states. To speak of "the African position" or "the European position" understates the diversity of views that must ultimately be made compatible, if not homogeneous, for these important

polities to achieve mutual fiscal and social improvement.

I found it phenomenally satisfying to urge and encourage my African colleagues and other interested parties to find a way to make common cause regarding Internet address space management. This raw material is the stuff of which the Internet is made. The creation of AFRINIC, itself, is a most important event in Africa's Internet history. It showed that a diverse continent could achieve a common goal by aligning their mutual interests. Having achieved that goal, AFRINIC's creation was and is a concrete demonstration that African states have the capacity to cooperate and collaborate. It was especially satisfying to watch the

existing Regional Internet Registries, in cooperation with ICANN, to lend support for and to facilitate AFRINIC's birth.

My natural reaction to this is, of course: "Now that you have demonstrated willing ability to collaborate, what else can you do?" The reward for good work is MORE WORK! It is clear that AFRINIC and its sister organisations are forging a pan-African path towards a safer, more accessible, more affordable and more useful Internet. All of us share this global aspiration.

I, for one, am pleased to have an opportunity to recognise now the courage and skills of Africa's AFRINIC team and wish them every success as they take the Internet into the future."

# 1995-2003

## → 1995 // JUNE

- › First African Meeting held during INET 96, Hawaii, USA.

## → 1996 // JUNE

- › The 'Leland Initiative: Internet For Africa' gets underway – a USAID/State program to install or extend Internet connectivity in 20 sub-Saharan African countries.

- › First ISOC Chapter in Africa founded in Morocco.

## → 1997 // MARCH

- › Proposal to set up AfriNIC as the RIR for Africa circulated among African Internet community, authored by Alan Barrett, Nii Quaynor, Sana Bellamine, and Nashwa Abdel-Baki.

## → 1997 // JUNE

- › Proposal publicly announced at INET 97 in Kuala Lumpur.

## → 1997

- › First AfriNIC website launched.

## → 1998 // JUNE

- › Global consultation with John Postel, Jon Klenson, Randy Bush, Geert Jan de Groot, and others takes place during INET 98 in Geneva.

## → 1998 // DECEMBER

- › African Regional Conference on Internet Governance takes place in Cotonou, Benin. First consensus-building meeting facilitated by Pierre Oudraogo, Pierre Dandjinou and Nii Quaynor.

- › Proposal to establish the African Regional Network Information Centre (AfriNIC) finalised. Provisional Board of Founding Trustees announced: Tarek Kamel (Egypt), Zakaria Ould Amar, (Mauritania), Charles Musisi (Uganda), Ibrahim Ahmed (Djibouti), Nii Quaynor, (Ghana), Pierre Dandjinou (Benin), Samuel Nogha (Cameroon), Kouma Cyriaque Didier (Gabon), Alan Barrett (South Africa), Silvio Almada (Angola), Yann Kwok Kem Yen (Mauritius), Haja Ramboasalama (Madagascar).

## 🗣️ PIERRE DANDJINOU

*AfriNIC's provisional Board of Trustees 1998, Chairman of the AFRINIC Board 2004 - 2008, AFRINIC Council of Elders, VP Stakeholder Engagement - Africa, ICANN*

As we celebrate AFRINIC's 10th anniversary, many images and thoughts cross my mind! I recall my first meeting with Dr Nii Quaynor in Geneva at one of the White Paper meetings that gave birth to ICANN; that was back in 1997. We were just two Africans there among the 700 participants! We wondered whether this really mattered for Africa. Moreover, we decided that whatever the case, Africa had to be part of the movement and key to this idea was that the continent established a regional registry of its own, which catered for Africa. The Cotonou Summit on Internet governance, which I organised later on in 1998, was instrumental to positioning the dream of AFRINIC on the right track. This took us seven years to materialise, with the first Steering Committee having had to deal with African intricacies, like reconciling the multiple languages and regional sensitivities or selecting host countries for AFRINIC. But the committee prevailed over these and we ended up selecting four countries to host different components and therefore respecting a regional balance.

## → 2000 // MAY

- › AfNOG holds inaugural Meeting in Cape Town, South Africa. First AFRINIC Provisional Board of Trustees Meeting takes place. Second consensus-building meeting takes place, facilitated by Vint Cerf.

## → 2000 // JULY

- › Key players in the African Internet meet in Japan during the ICANN Yokohoma Meeting to discuss Africa's participation in the global Internet.

## → 2000 // AUGUST

- › Africa Telecom Operator Meeting, Gambia, takes place: AfriNIC gives presentation to the African telecom/ISP community.

## → 2000 // NOVEMBER

- › Rathbawn Computers Ltd applies for TLD strings including .africa. Africans speak out and launch campaign to keep .africa on the continent.

## → 2001 // MAY

- › The AfNOG II meeting in Accra, Ghana takes place. 📍 1

- › First Interim Board nominated.

## → 2001 // JUNE

- › AfriDNS - an aggregation of information about African domain names - launched by Alan Levin.

## → 2001 // SEPTEMBER

- › First draft of the AfriNIC Business Plan v.0 issued for public comment.

## → 2002 // JANUARY

- › AfriNIC incorporation plan is adopted by the Interim Board.

## → 2002 // MAY

- › The RIRs welcome AfriNIC to the team.

- › AfriNIC signs an MoU with the RIPE NCC, which will provide training for AfriNIC's hostmasters and assist with the setting up of the RIR functions.

- › ARIN issues statement of support for AfriNIC.

- › LACNIC organises the Emerging RIR Workshop in Montevideo, Uruguay, to assist AfriNIC with the RIR formation process.

## 🗣️ TAREK KAMEL

*AfriNIC's provisional Board of Trustees 1998, Sr. Advisor to the President - Gov. Engagement ICANN*

Looking back, I was delighted to be part of the Founding Board of AFRINIC more than ten years ago. We were initially puzzled about where to establish AFRINIC. Similar to the Internet Governance Ecosystem, which had a distributed model from its early beginnings, AFRINIC's establishment also took on this distributed sub-regional African approach. The main operation started in South Africa, with a backup in Egypt (North Africa). The organisation was incorporated in Mauritius (East Africa) and the training centre was established in Ghana (West Africa). By using this distributed governance model we kept all of the African sub-regions - the south, the north, the west and the East - happy and included, while not compromising on the benefits for AFRINIC as an organisation from a legal or operational point of view. I have enjoyed watching a true model of coaching from the other RIRs that existed at that time to help and support the newly borne RIR in Africa. And I am glad to see that AFRINIC is today part of the well-established global Internet Governance Ecosystem.

# 1995-2003 CONTINUED

## → 2002 // AUGUST

- Adiel Akplogan hired as Senior Hostmaster.

## → 2003 // JANUARY

- AfriNIC hires Ernest Byaruhanga as Hostmaster.

## → 2003 // FEBRUARY

- Calls for host country proposals issued.

## → 2003 // MAY

- Hostmaster training starts at the RIPE NCC. Ernest Byaruhanga and Adiel Akplogan spend six months in Amsterdam, the Netherlands, learning RIR processes.

## → 2003 // JUNE

- The AfNOG 5 Meeting takes Place in Kampala, Uganda.  2

- The following countries announced as potential locations for AfriNIC: South Africa, Kenya, Mauritius, Egypt and Ghana/Uganda/Senegal (joint proposal).  3

## → 2003 // OCTOBER

- Adiel Akplogan takes on role as AfriNIC Project Manager.

## → 2003

- Adiel Akplogan, former President of Senegal and the OIF Abdou Diouf, and the French Ambassador to Mauritius sign an MoU on funding from the French Ministry for AfriNIC's capacity building efforts.  4

## AXEL PAWLIK

*Managing Director RIPE NCC*

More than ten years ago, at the RIPE NCC offices in Amsterdam, Adiel Akplogan and Ernest Byaruhanga spent many weeks with us, learning the ins and outs of serving a membership of Local Internet Registries, before returning to Mauritius to take up their roles as leaders of the fledgling RIR. I have always been impressed by the skill and commitment of the AFRINIC staff and the strong, informed support of their diverse community. The result of that combination has been an organisation whose impact and influence have far exceeded the resources available to it. It has been a privilege for the RIPE NCC (and for me personally) to have made some small contribution to AFRINIC's inspiring first 10 years, and I look forward to a close and productive continuing relationship. Congratulations to all at AFRINIC and all those who have contributed to its success.

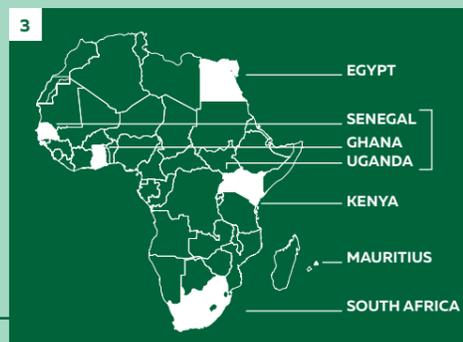

## PAUL WILSON

*Director General APNIC*

In May 2003 I helped to organise an RIR workshop for the AfriNIC board-elect and other key individuals. It was at this meeting that Nii Quaynor first mentioned Adiel Akplogan's name, who he described as a talented engineer and manager from Togo, and the best hope yet for AfriNIC's CEO. As I came to know Adiel and to work with him closely in the following years, I never doubted Nii's assessment, or that Adiel remained the best hope for a stable and successful AfriNIC. Without doubt, Adiel was the backbone of AfriNIC for its first 10 years, and I hope this is never forgotten. I have always felt that the task of building AfriNIC was harder than that of any other RIR. As the last of five RIRs to be established, AfriNIC was founded in a time of political pressure and contention that was higher than the others ever experienced. It served a region larger and more diverse than most of the other RIRs, with a very high proportion of developing economies, which could naturally not contribute significant resources to the organisation. I gained a huge admiration for Adiel as CEO, for his staff and for the active board members, for their incredible and successful work under these circumstances.

## PIERRE DANDJINO

*AfriNIC's Provisional Board of Trustees 1998, Chairman of the AfriNIC Board 2004 - 2008, AFRINIC Council of Elders, VP Stakeholder Engagement - Africa, ICANN*

Upon AFRINIC's formal accreditation in 2005, and in my capacity as the Chair of the Board, I had this to say to the CEO: "We cannot fail! The world is watching us! We shall give you whatever you want, but AFRINIC has to be efficient and successful! It's all about Africa's image!" And here we are today, celebrating ten years of excellence, of tedious efforts, and also of learning and support to and from the other African Internet stars (AF\*). Yes, this was in our plans: AFRINIC should be run in such a way that it contributes to growth and inception of other Internet related associations. I want to take the opportunity to thank all who contributed to this success story, not forgetting our sister RIRs who have always been there to support our dreams. Long live AFRINIC!

## → JUNE

## ANNE-RACHEL INNÉ

*COO AFRINIC 2012 - 2014, NI&I Service Award Winner 2010, VP Government Engagement ICANN*

When thinking about what the future carries for Africa, AFRINIC always comes to mind as the central organisation of what I call the 'intelligently connected Africa'. I am very proud to have been part of the shaping and growth of this organisation and cannot wait to see it all over the continent and helping to connect our networks for a sustainable, digital and prosperous Africa. AFRINIC is a tribute to how the African community can come together and do something really great that includes all our stakeholders.

*AfREN, AFRINIC Community, NI&I Service Award Winner 2014*

It has been a long journey since the Cotonou meeting in 1998 that led to the creation of AfriNIC in 2005. It has not always been easy, but the community can be proud of AfriNIC's achievements. The organisation has matured and has acted, for many years now, as an incubator for various initiatives that enrich the African Internet ecosystem. AfREN, the collaboration platform for the research and education community, benefitted in its early years from this handholding by AfriNIC and AfNOG. There is no doubt that AfriNIC will continue to grow and will reach even greater heights.

### DAWIT BEKELE

*Director African Regional Bureau, Internet Society*

What an amazing achievement in 10 years! It has been a great pleasure seeing AFRINIC growing year after year while contributing significantly to and beyond its mandate of managing Internet Numbers in Africa. During the last decade, AFRINIC has become a major voice of the continent when it comes to the Internet. It has also led Africa's transition to IPv6 and worked tirelessly to inform policy makers about Internet governance issues. Congratulations to the past and present CEOs, board members and staff from all over Africa for their dedication and hard work towards these successful achievements and for having taken the flames of Africa around the world. Long Live AFRINIC!

### SEUN OJEDEJI AND ADAM NELSON

AFRINIC Policy Development Working Group co-Chairs 2015

The first AFRINIC public policy meeting was in May 2004, during which our first four policies were discussed. Each one of them was adopted and since then 20 more public policy meetings have been held and over 35 policies have been discussed. More than 80% of these have been approved and implemented. The policy discussion list has also witnessed over 5000 messages with the quality of the conversation getting better over the years. We have also experienced great leadership starting from Vincent Ngundi, the first Chair (of the previously called Policy Development Process Moderator Group) up until now and have enjoyed the support that comes from AFRINIC's current Policy Manager, Ernest Byaruhanga. The history of AFRINIC policy development would not be complete without mentioning our former CEO Adiel Akplogan who provided an enabling platform for the community. We are particularly delighted that the new CEO, Alan Barrett, is indeed a PDP Co-Chair alumnus and we use this opportunity to formally thank him for his service. 10 years down the road and we can say a lot has been achieved, but all these achievements would not have been possible without the support of the entire community, and we believe that with an increasingly vibrant and broad community, more ground-breaking achievements will be made that we will all be proud to talk about when we celebrate the next decade.

2

→ MARCH

- › African IPv6 Task Force launched.

- › First IPv6 Webinar for African Operators held. Over 70 people attend online.

→ MAY

- › AfriNIC launches a rebrand, unveiling a new way of writing its name: AfriNIC is now known as AFRINIC. 📷 1

- › Online voting platform launched. Members can now vote online during AFRINIC elections.

- › The AFRINIC-16 Meeting held in Serekunda, The Gambia. 284 people attend.

- › The Africa Internet Summit (AIS) is launched during the AFRINIC-16 Meeting by AFRINIC and the AfGWG.

- › Alain Aina, AFRINIC's then Special Projects Manager, wins the prestigious Network Information and Infrastructure (NI&I) Service Award. 📷 2

- › AfriNIC's flagship development programme, the Fund for Internet Research and Education (FIRE), launched. The FIRE programme promotes Internet development in the African region through small grants and awards to regional ICT development projects: [www.fireafrica.org](http://www.fireafrica.org). 📷 3

- › DNSSEC signatures in reverse DNS zones enabled.

🗣️ ALAN P. BARRETT

*Internet Pioneer and AFRINIC CEO 2015*

**Building consensus in the community was difficult in the early days, but we have overcome our differences and created an organisation that enjoys widespread support.**

→ JUNE

- › World IPv6 Day launched. AFRINIC celebrates with a day of IPv6-related presentations and discussions on what deployment means for Africa.

→ JULY

- › Ms Anne-Rachel Inné, a key figure in the African and global Internet industry, appointed AFRINIC Chief Operations Officer (COO).

→ AUGUST

- › AFRINIC's IPv6 Training achieves IPv6 Gold Certification. 📷 4
- › Dedicated portal for training and education launched – [training.afrinic.net](http://training.afrinic.net).
- › AFRINIC IPv6 Training Program receives new IPv6 testbed, donated by Cisco, from the 6Deploy initiative.

→ OCTOBER

- › AFRINIC and ICANN CEOs sign an LoA to facilitate the deployment of anycast instances of the L-root DNS server, operated by ICANN, in the African region. 📷 5

- › First AFRINIC Member and Community Survey launched.

- › ICANN's Africa Strategy Working Group (ASWG) launched. Dr Nii Quaynor selected to lead the group's efforts.

→ NOVEMBER

- › AFRINIC-17 Meeting takes place in Khartoum, Sudan. 150 people attend. It's the first meeting to feature a parallel IPv6-only network. 📷 6

- › AFRINIC, APNIC and LACNIC together secure an AUD \$1.5 million SIDA Grant to promote Internet innovation in developing economies through their respective grants and awards programmes.

🗣️ QUOTE

FADI CHEHADÉ  
*CEO ICANN*

Today as AFRINIC celebrates 10 years of operation, we remember and salute the tireless efforts and volunteer spirit of the global Internet community and especially the Africa Internet pioneers - Dr Nii Quaynor, Pierre Dandjinou, Mouhamet Diop, Tarek Kamel, Alan Barrett and most importantly, the founding CEO Mr Adiel Akplogan. And this is just to mention but a few of the esteemed pioneers to whom the Internet community owes so much! Thank you for a job well done. Indeed we shall forever be indebted to your collective wisdom and foresight, hard work and tireless efforts, which ensured that AFRINIC survived its formative years to become a well-structured and efficient RIR. I want to appeal to Africa to ensure that its voice and influence is heard in the global Internet debate, especially in this defining moment as the global community develops a proposal to transition the IANA stewardship from the NTIA. I truly believe that our collective efforts will culminate in a common shared goal: a single, interoperable Internet supported by stable, secure and resilient unique identifier systems. Happy 10-year anniversary!

#### » MICHUKI MWANGI

NI&I Young Professional Award Winner 2010, Senior Development Manager for Africa, Internet Society

10 years go, the African Internet community was small, the networks and "eyeballs" were largely invisible. Today, not only has the African Internet community flourished but the number of African networks and "eyeballs" has soared. Thanks to AFRINIC, we can now define, measure and value our Internet, the "African Internet"! AFRINIC! En avant!

#### » DOUGLAS ONYANGO

NRO-NC/ICANN ASO-AC Representative, AFRINIC NomCom Chair 2013, Program Manager, WIPRO Technologies

The formation, and subsequent growth of AFRINIC, has been nothing short of spectacular: the gradual growth, from a handful of meeting attendees to roomfuls; to the burgeoning quality and intensity of community deliberations; to the continued maturity and competitiveness of the board in discharging its duties. Even with all the pains, it's been very gratifying, and I am proud to be a part of it. My very best compliments to the community on making it to 10 years. I sincerely look forward to another decade of development, transformation and engagement.

3

## → MARCH

› The US NTIA announces the intention to transition the oversight of key Internet functions, including the Internet Assigned Numbers Authority (IANA), to the global Internet multi-stakeholder community. The AFRINIC community, together with the other RIR communities, begin preparing a proposal for a new phase in the development of the Internet numbers industry.

› AFRINIC WHOIS webupdate platform launched: objects can now be created, updated and deleted in the Whois database via the AFRINIC website.

## → MAY

› AFRINIC-20 Meeting and the AIS'14 takes place in Djibouti. Over 400 people attend. 📍 1

› First Digital Content Localisation for Africa Workshop, led by AFRINIC's Duksh Koonjoobeharry, takes place during the AIS'14. 📍 2

› AFRINIC signs Letter of Intent (LoI) with the ITU-BDT Director Mr Ibrahim Sanou to promote IPv6 deployment throughout Africa. 📍 3

› Global IPv4 supply reaches critically low level, triggered by LACNIC's pool of available IPv4 address space reaching a /9.

› AFRINIC launches New Membership Registration Portal.

## → JUNE

› AFRINIC installs RIPE Atlas Anchor on its Infrastructure in Mauritius.

## → JULY

› AFRINIC's IANA Stewardship Transition discussion list launched.

› AFRINIC CEO represents the NRO together with APNIC Director General in London at the first gathering of the IANA Functions Stewardship Transition Coordination Group.

## → AUGUST

› AFRINIC launches new version of WHOIS.

## → SEPTEMBER

› AFRINIC Board of Directors announces departure of founding CEO Adiel Akplogan.

› AFRINIC deploys its own Internet Routing Registry (IRR), the first to originate in Africa, and calls for members to populate it.

› The IANA allocates a /12 of IPv4 address space to AFRINIC and each of the other four RIRs in accordance with the "Global Policy for Post Exhaustion IPv4 Allocation Mechanisms by the IANA".

› The five RIRs set up the Consolidated RIR IANA Stewardship Proposal (CRISP) Team to produce a single proposal for the transition of the IANA functions from the global IP addressing community.

## → NOVEMBER

› AFRINIC-21 Meeting held in Mauritius. Over 170 people attend. 📍 4

› Survey launched to gather the AFRINIC Community's input on the IANA Stewardship Transition.

› AFRINIC/RIPE Atlas project launched to support Internet measurements both globally and within the African region.

## → DECEMBER

› AFRINIC closes its 10th year of formal operations with 42 dedicated staff, over 1,150 members, an innovative community of thousands, a loyal Board of Directors, an experienced Council of Elders and a huge network of local, regional and global supporters and partners.

🗣️ MARK ELKINS

*Internet Pioneer and AFRINIC Board member 2006 - 2015*

AFRINIC may have taken a few years to complete its own incubation but since then, over the last ten years, it has become the most successful and important Internet organisation to cover the African continent. It is a leader in the training it gives throughout the continent and an amazing example of community driven, bottom-up governance. It's a glowing example for others to follow.

## IN REMEMBRANCE

In Remembrance of Tim Christensen, Quality Assurance Manager, ARIN, who passed away in 2014. Tim single-handedly undertook all the technical work to build and prepare AFRINIC's original Database in 2004, before AFRINIC was formally recognised as an RIR. When AFRINIC opened for business, it opened with a database ready to go and this was down to Tim, who devoted six months of his professional life to this project. Thank you Tim.

AFRINIC - A DECADE OF OPEN AND COMMUNITY-DRIVEN NUMBER RESOURCE MANAGEMENT IN AFRICA
